From the Moberly Monitor. Nancy Collins, a colored laundress, has a house on Sturgeon street. We give her statement of a difficulty that occurred at her house last night. Nancy says that she keeps a laundry on Sturgeon street; that having a large ironing on hand, and being desirous of going to Renick to a party, she sat up later than usual to finish her work and get ready for the down train. Not physicians had been attending her for half having finished her work, however, she retired to bed between 12 and 1 o'clock and abandoned the idea of attending the party. Between 1 and 2 o'clock, a party of men came to her door and demanded admitsee, which was refused, and they were warned to leave. The men persisted and threatened to break the door open. Nancy reached for a single barreled pistol, a Derringer, which she keeps under her pillow, and held it in readiness for instant use. The men began to press against the door. which was securely fastened, and Nancy fired just as the door flew open. The men then rushed in and demanded her pistol, which she refused to give up. A MYSTERIOUS BOOK

The Pigure it Might Have Cut in the Attaway-Able Matter.

From the St. Louis Star. siderable time this morning in the general run of conversation. The office of the Coal Oil Inspector, on Chestnut street, was a they found neither Mr. Attaway, who had gone to Jefferson City, nor Mr. Able, who had gone out on other business. Part of the office-which is located on Chestnut street, under the Polytechnic Institute-is occupied by Mr. Harrington, in whose employ is a very intelligent lad named Had-

This boy made a statement to a Star reporter that Mr. Able had given him a book to keep on Monday morning which was inscribed "Walter Pierce Oil Co.," and told him to keep it for him until evening. Whatever the book might have been or what bearing it had on the case, he could not say, but he probably made a mistake in the name which might have been "Waters & Pierce Oil Company," whose establishment is located at the corner of Third street and that that evening he had returned the book to Able and had taken a note to J. J. Daly or another one; whether Mr. Able had received the book or not he was unable to eay, but thought he had; had noticed no unusual amount of book keeping going on that evening.

A visit to John J. Daly & Co., developed no new facts. An ordinary account book charged Feb. 3, and was presumptively declined. There were no special marks about

it and it was charged at \$2 25. The Waters, Pierce and Co. Oil Company was next called upon. The secretary, Mr. Adams, stated that Able had made his inspections at the works of the company at tions wanted from St. Louis. Accordingly Thirteenth and Gratiot and Eighteenth and Randolph, and had presented his bills on the day prescribed and been paid there-C. and A., who reserved the ten sections for. Nothing was known at the office re-

His operations were entirely with the Superintendent, Mr. Findlay, who received the spoken for the drawing room from St. Louis goods and shipped them. Had there to Chicago. He also explained that the gular Chicago and Alton elespere didn't been any storage in the barrele have any drawing-room, and it doesn't ap- at the office of the company, and there was not a single case of that kind known. As for the difference in grades of goods the company endeavored at all times to keep it up. The only difficulty was the effect that she learned that the sleeper with a that very cold weather had on lard, and a drawing room had been sent down from even carbon oils, very often congenling the Chicago in place of the ordinary Pullman former so that it was hard to draw it, owing to congeniation.

The reporter talked with a number of Able's friends during the morning and they shoulder it. Still at the same time confiing room space, so the diagram showed.
